DESCRIPTORS Adults; *Employment; *Financial Policy; *Handicapped; Job Placement; Job Skills; Productivity; *Program Administration; Research Projects; *Sheltered Workshops; Statistical Data; Young Adults

ABSTRACT

Presented is the statistical appendix to the Department of Labor's survey of sheltered workshop programs for handicapped persons. Included are 198 tables on such aspects as regional distribution of sheltered workshops and clients, client capacity of workshops, clients not accepted for workshop services, capital investment in plant and equipment, annual operating income, client productivity, average annual client earnings, contractors, interprogram transfer of clients, training provided clients in workshops, client placement in competitive employment, and collective bargaining. Technical Notes	A-iii
List of Tables	A-xv

TECHNICAL NOTES

A. Funding of the Study

The workshop survey was jointly financed by the Manpower Administration (now the Employment and Training Administration) and the Employment Standards Administration of the DOL.

B. Scope and Methodology of the Study

The study of workshops was initially conceived as a two-phase program with Phase I comprising a mail questionnaire survey of all known sheltered workshops and Phase II a personal interview of approximately 3,000 clients randomly selected through a stratified sample of some 600 workshops from the payroll data collected in Phase I.

The Phase I mail survey of sheltered workshops was designed to provide data on: The various characteristics of workshops and the number of clients served; staffing and professional services provided; financial operations including sources of income, type of expenditures, and investment in plant and equipment; major commodities produced and services rendered; client training, production, wage earnings, fringe benefits, job placement and collective bargaining; and opinions on the effect of the work activities center concept established by the 1966 Amendments to the FLSA.

The Phase II client interview program was developed as a supplement to the workshop survey to deal with the relationship between the client and the workshop. The interview covered the client's involvement in workshop programs and services; the degree of satisfaction with earnings, services, and working conditions. The interviewer also collected information on client workshop earnings and supplemental income, tenure and mobility, type of disability and demographic characteristics.

If the client was unable to respond adequately, similar questions were put to a responsible parent or quardian.

The original plan for the client interview was to select clients from the May 1973 payroll data collected in the Phase I survey but the plan was changed when unexpected delays resulted in a time lapse of almost three years. (The average stay of clients in a workshop was estimated at less than three years). In the revised plan clients were randomly selected from a stratified sample of the universe of all workshops, including those that did not participate in the Phase I study.

The mail survey of Phase I was planned and conducted by the DOL's Division of Evaluation and Research. The completed questionnaires were edited by the Wage and Hour Division which also obtained missing information and resolved inconsistencies by telephone or written contact with the workshops.

The Phase I survey covered the 1972-1973 operating period. Some workshops reported on calendar or fiscal year 1972 operations while others reported on calendar or fiscal year 1973 operations -- depending on the data available at the time of their completion of the survey questionnaire. Data on client wage earnings, disability, and status were reported for a payroll week which included May 15, 1973.

This report presents the findings for the Phase I workshop survey only. The Phase II client interview survey was completed in early 1976. Data are currently being tabulated by the Bureau of the Census and a separate report will be prepared as soon as the data have been analyzed.

1. Development of universe.

A comprehensive list of sheltered workshops was developed from the DOL records of workshops certificated under the FLSA, supplemented by additional listings provided by the Rehabilitation Services Administration of the Department of HEW, and by State rehabilitation facilities specialists. In an effort to provide the most complete coverage, the study included noncertificated workshops as well as the certificated workshops. (Previous Department of Labor studies were restricted to certificated workshops.)

2. Survey response

Survey questionnaires were mailed to a total of 3,021 facilities believed to-be operating workshops between August 15 and October 10, 1973. An additional 20 questionnaires were subsequently mailed to newly identified workshops, for a total of 3,041 questionnaires. Follow-up letters were sent to all nonrespondents in October and December. Additional follow-up contacts were made by Wage and Hour national office and field personnel as well as by cooperating national and state organizations involved with workshops.

The total response was as follows:

Workshops submitting usable questionnaires	1,917
Nonrespondents:	
Not operating a workshop	437
Duplicates, mailed/returned, no longer in operation	278
Nonresponse, non-cooperative	409
Total mailing	3,041

A total of 1,447 questionnaires (75 percent of the total responding) were received in the first four months, the balance over a nine-month period. Because many questionnaires were either incomplete or contained data which were inaccurate or inconsistent, an extensive personal contact follow-up program was carried ot to obtain missing information or to reconcile apparent discrepancies.

The questionnaires used in the study represented 1,786 workshop establishments* operating a total of 2,530 workshop programs (regular program workshops, work activities centers, and training and/or evaluation programs). Included in the survey were 1,623 certificated workshops operating 2,355 workshop programs (79 percent of all certificated establishments and 75 percent of all certificated programs as of June 1973), and 163 noncertificated workshop establishments operating 175 programs (41 percent of identified noncertificated establishments and programs).

*The 1,786 count was found to be in error after development of tables. The correct establishment count was 1,938 but the 8.5 percent differential was not sufficient to justify major table correction.

3. Data reporting

Sheltered workshop operations have a variety of forms. Some workshops operate as independent corporate entitles and others as departments or components of rehabilitation centers, hospitals, schools or other institutions. In this survey the various types were not distinguished or separately identified, although workshop programs (regular program workshops, work activities centers, and training and/or evaluation programs) were reported separately and as single or multiple-program establishments.

This variety of operating structures caused a degree of inconsistency in the reporting of operating data, especially in the financial and service sections. For example, a workshop operating as a component of a multi-program facility might have reported financial data for the workshop exclusively but would report staff and services provided for the entire facility, thus presenting an unrealistically low cost for staffing. In other instances the workshop reported workshop operations only, excluding the rehabilitation services program provided to workshop clients, while other workshops included rehabilitation services as well as the productive employment.

Although basic terms were defined in the questionnaire there may have been some confusion with the term "clients served". Some workshops appeared to have included only those clients who were receiving wages while others seemed to include nonwage clients in evaluation, counseling and training as well as client employees. The inclusion of nonemployee clients would have the effect of distorting calculations of average wages and similar data.

Every effort was made by the DOL editing staff to correct the reporting data when inconsistencies were observed but detection was not always possible.

These limitations in the data reporting system should be considered in any interpretation of the findings.

C. Definitions

Terms used in this report are defined in order to assist in the review and interpretation. The definitions are arranged according to classes of usage rather than alphabetically.

1. Organizations

"Rehabilitation facility" is an operation, the primary purpose of which is to provide vocational rehabilitation services to, or gainful employment for, handicapped individuals. It may provide one or more of the following services: Comprehensive rehabilitation services which include medical, psychological, psychiatric, social, and vocational services; testing, fitting or training in the use of prosthetic devices; prevocational conditioning or recreational therapy; physical and occupational therapy; psychological and social services; evaluation; personal and work adjustment; vocational training; evaluation or control of special disabilities, and transitional or long term employment for severely handicapped persons who cannot readily be absorbed into the competitive labor market.

"Sheltered workshop" or "Workshop" is a nonprofit rehabilitation facility -- a charitable organization or institution -- conducted for the purpose of carrying out a recognized program of rehabilitation for handicapped persons and/or providing such individuals with remunerative employment or other occupational rehabilitating activity of an educational or therapeutic nature. A workshop may be a free-standing operation or it may be a part of a comprehensive rehabilitation facility, a hospital or an institution.

"Workshop establishment" is a separate organizational entity operating one or more workshop programs as described below, or it may be a branch of a multi-unit workshop that is located at a different address.

"Workshop program" is the operation, for purposes of this report, of a regular program workshop, a work activities center or a training and/or evaluation program. Workshop programs may operate singly or in combinations of two or more programs within a workshop establishment.

2. Type of workshop programs

"Regular program workshop" is a sheltered workshop other than a work activities center or an evaluation program or training program.

"Work activities center" is a workshop or a separate department of a workshop having an identifiable program, separate supervision and maintaining separate records, planned and designed exclusively to provide therapeutic activities for handicapped workers whose physical or mental impairment is so severe as to make their productive capacity inconsequential. (The test of inconsequential productivity is described in the FLSA regulations Part 525.2).

"Training program" relates to a program designed to develop the patterns of behavior which will help a client adjust to a work environment or teach him/her skills related to a specific occupation.

"Evaluation program" relates to a program that uses the medium of work to determine the client's potential. (Training and evaluation programs were grouped together in this study).

3. Classification of workshops

Workshops participating in this study were classified by the primary disability group served:

"Mentally retarded" - a majority of the clients served have as their major disability mental retardation.

"Blind" - a majority of the clients served have as their major disability a visual handicap, including blindness.

"Alcoholic" - a majority of the clients have alcoholism as their manor disability.

"Other" - a majority of the clients have as their major disability categories which are grouped with other or miscellaneous because of the limited number of any specific disability category.

"General" - includes clients with major disabilities listed above but no one disability group accounts for a majority of them.

4. Organizational structure

"Privately operated workshop" is a workshop operated as a volunteer, nonprofit corporation, or component of a corporation, with a volunteer board of directors. Privately operated workshops are usually community based.

"Publicly operated workshop" is a workshop operated by a Federal or State government or a political subdivision thereof such as a city or county. It may be operated independently or as a component of a school, hospital or institution.

5. Certification status

"Certificated workshop" is a workshop holding a certificate from the DOL authorizing the payment of subminimum wages to handicapped workers (clients) under FLSA, or PCA.

"Noncertificated workshop" is a workshop operating without a DOL certificate. The workshop may not require a certificate either because it is paying all handicapped workers at least the applicable statutory minimum wage, or it is not performing work which is covered by the FLSA.

6. Client classification

"Handicapped worker", "client" and "client/employee" are used interchangeably in this study and elsewhere to refer to an individual whose earning capacity is impaired by age or physical or mental deficiency and who is employed in accordance with the recognized program of a sheltered workshop either at the facilities of such agency or at home.

"Individual rate client" is a handicapped worker/client working in a regular program workshop at a rate which is less than the regular program certificate rate, because of the severity of his/her disability.

"Learner" is a beginning worker in a regular program subject to an authorized learning rate for a limited period of time. The learning rate is less than the regular program certificate rate but not less than 50 percent of the FLSA minimum rate.

7. Client counts

"Average daily client attendance" (ADA) is the average number of clients participating in workshop programs on a daily basis.

"Total number of clients served during the year" represents the total number of different clients receiving services including employment during the year.

"Unduplicated count" is the number of different clients involved in the term response.

8. Client wages and earnings

"Hourly rate" is the wage payment per hour for the client.

"Piece rate" is the rate of pay based on number of units or commodities produced or serviced.

"Make-up pay" is wages paid to a handicapped person working on a piece rate basis to raise his/her average hourly wage earnings for the week to at least the minimum level specified in the applicable certificate.

"Pay-out ratio" represents the ratio of annual client wages to annual income from work program less the cost of purchased materials and supplies.

"Fringe benefits" are nonwage benefits received by handicapped workers including such things as vacation, holiday, and sick pay, worker's compensation insurance coverage and Social Security and other retirement plan coverage.

9. Financial operation

"Total operating income" includes all funds received by a workshop for operating purposes.

"Total operating expenses" represent all expenditures to operate the programs of the workshop organization.

"Earned operating income" includes total income received from the work program and training and evaluation fees.

"Income from work program" is all income produced by the work program, including subcontract work, manufacturing of new goods, provision of commerical/industrial services, sales, renovation, salvage and miscellaneous activities.

"Training and evaluation fee income" is income received in the form of fees for services provided to clients.

"Subsidy income" includes grants, gifts, donations, endowments, allocations from community agencies (such as the Community Chest and United Way), and other contributions.

"Capital investment/expenditures" represent funds expended for buildings and equipment that are not considered operating expenses. Ideally, such expenditures are made from sepcial funds or grants rather than from operating income.

10. Employment

"Sheltered employment" is employment of handicapped persons in a sheltered workshop program in which production standards, requirements, and norms are less than those established for non-handicapped workers in the regular labor market. Two types of sheltered employment are provided in workshops:

> "Transitional employment" is a program designed to move a client/employee through the workshop and into employment in the community. These programs frequently include training services as well as employment.

"Extended employment" is a program designed to provide long term employment in the workshop for client/employees whose functional limitations or handicapping conditions are such as to make employment outside the workshop an unrealistic goal; or the client needs extended work conditioning in preparation for non-sheltered competitive employment. Greater emphasis usually is placed on wage earning and less on training for severely handicapped persons in extended employment.

In actual practice little distinction is made between transitional employment and extended employment because the programs tend to merge and the movement of clients through the workshop is usually more dependent on job opportunities in the community, efforts of workshop staff to develop and/or identify job opportunities for clients, and client readiness than on the type of workshop employment provided.

"Competitive employment" is employment in a work setting (usually outside the workshop) in which production standards and requirements are based on nonhandicapped workers (workshop employment is considered non-competitive employment).

11. Regions

The United States was divided into regions for this study:

"Northeast" - included Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island and Vermont.

"North Central" - included Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota and Wisconsin.

"South" - included Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia and West Virginia.

"West" - included Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming, Alaska and Guam.

141. Productivity test as a qualification for a work activities center by region, client size and income size of workshop----------- A-994

142. Earnings test as a qualification for a work activities center by region, client size and income size of workshop---------------- A-996

143. Effect of separation of regular program workshop from work activities center on policies relative to admission of handicapped persons by region, client size and income size of workshop------------------- A-998

Effect of separating the regular program workshop from the work activities center on selected activities in the regular program workshop and in the work activities center in workshops that employed both inconsequential and better producers in an integrated program prior to February 1967 -

144. Region--------------------------------------- A-1000

145. Effect on regular program workshop by client size of workshop------------------- A-1006

146. Effect on work activities center by client size of workshop------------------- A-1012

147. Effect on regular program workshop by income size--------------------------------- A-1025

148. Effect on work activities center by income size--------------------------------- A-1034

149. Primary disability group served------------ A-1045

CONTENTS

Tables (Continued) Page

Evaluation by certificated workshops of effect of work activities center concept established by 1966 Amendments to FLSA: (Continued)

Effect of separation on client progress and employment opportunities for inconsequential producers in workshops that employed both inconsequential and better producers in an integrated program prior to February 1967 -

150. Region-- A-1051

151. Client size of workshop-------------------- A-1052

152. Workshop income size----------------------- A-1053

153. Primary disability group served------------ A-1054

Effect of the term "work activities center" on program image, community support, and grant funds in workshops operating a regular program workshop and a work activities center in 1973 that employed both inconsequential and better producers in an integrated program prior to February 1967 -

154. Region-- A-1055

155. Client size of workshop-------------------- A-1056

156. Workshop income size----------------------- A-1058

157. Primary disability group served------------ A-1060

Effect of 1966 FLSA Amendments on specified aspects of the work activities center in workshops that employed both inconsequential and better producers but not in an integrated program prior to February 1967 -

158. Region-- A-1061

159. Client size of workshop-------------------- A-1066

160. Workshop income size----------------------- A-1075

161. Primary disability group served------------ A-1085

CONTENTS

Tables (Continued)

Page

Cumulative percent distribution of all clients in sheltered workshops by average straight-time hourly earnings, May 1973:

162. Major disability of client------------------ A-1090

163. Age of client-------------------------------- A-1096

164. Client size of workshop--------------------- A-1102

165. Income size of workshop--------------------- A-1108

166. Sex and race of client by primary disability group served--------------------------------- A-1114

167. Sex and race of client by primary disability group served--------------------------------- A-1120

168. Type of client------------------------------- A-1150

169. Type of client by primary disability group served------------------------------------- A-1153

Cumulative percent distribution of clients in selected workshop groups by average straight-time hourly earnings, May 1973:

170. Type of client in Goodwill Industries of America workshops---------------------------- A-1165

171. Type of client in Volunteers of America workshops------------------------------------- A-1166

172. Type of client in National Industries for the Blind workshops------------------------- A-1167

173. Type of client in workshops for the aged---- A-1168

CONTENTS

Tables (Continued) Page

Cumulative percent distribution of covered and noncovered clients in sheltered workshops by average straight-time hourly earnings, May 1973:

174. Region-- A-1169

175. Length of employment---------------------- A-1175

176. Method of wage payment------------------- A-1181

177. Primary disability group served----------- A-1187

Cumulative percent distribution of clients in sheltered workshops engaged in specified types of work by average straight-time hourly earnings by type of work, May 1973:

178. Covered and noncovered clients performing subcontract work--------------------------- A-1193

179. Clients performing subcontract work by sex of client------------------------------------- A-1205

180. Covered and noncovered clients performing salvage and renovation work---------------- A-1217

181. Clients performing salvage and renovation work by sex of client--------------------- A-1229

182. Covered and noncovered clients in manufacturing work--------------------------------- A-1240

183. Clients in manufacturing by sex of client-- A-1252

184. Covered and noncovered clients in miscellaneous occupations-------------------- A-1264

185. Clients in miscellaneous occupations by sex of client------------------------------ A-1276

CONTENTS

Tables (Continued)

Page

Numerical distribution of clients in sheltered workshops by average weekly earnings and average hours worked during survey week, May 1973:

186. Method of wage payment by region and State-- A-1288

187. Primary disability group served by region and State------------------------------ A-1297

Numerical distribution of clients in sheltered workshops by average straight-time hourly earnings and weekly hours of work during survey week, May 1973:

188. Covered clients---------------------------- A-1306

189. Noncovered clients------------------------- A-1312

Numerical distribution of all clients in sheltered workshops by weekly hours of work, May 1973:

190. Primary disability group served and coverage status------------------------------- A-1318

191. Primary disability group served and type of client-- A-1330

Percent distribution of clients in sheltered workshops by weekly hours of work, May 1973:

192. Region and State--------------------------- A-1338

193. Client size of workshop------------------- A-1347

194. Workshop income size---------------------- A-1353

195. Type of client by selected workshop group-- A-1359

196. Type of work and occupation---------------- A-1363

CONTENTS

Tables (Concluded) Page

Distribution of hours worked during survey week by covered clients at specified skill levels by type of wage payment, May 1973:

197. Type of workshop program (numerical and percent)---------------------------------- A-1375

198. Primary disability group served (percent)------------------------------------- A-1377
